Experience

- **Desyndev**   Jan 13 2023 - July 2023
  Data analyst intern
  At DesynDev, a fast-growing tech company, I completed a six-month internship as a Data Analyst and a django web developer. During my tenure, I collaborated with experienced professionals to analyze diverse data sets, create insightful reports, and support data-driven decision-making. I gained hands-on experience with data analysis tools and techniques, data visualization, data cleaning, and data manipulation. Additionally, I learned the full stack development with django and market trend technology's

Education

- **Government kallar higher secondary school , pappapatti**   2021
  Higher secondary
  80 %

- **The American college , madurai**   2021 - 2024
  B.voc Data science
  GPA : 9.1 (Distinction)

- **The American college , madurai**   Current
  M.sc Data science

Skills

- Python
- Django
- Htmll
- Css
- Tailwindcss
- Javascript
- Mysql
- GitHub
- Linux
- Excel
- Figma

Projects

- **Supermarket Data visualization**
  The project resulted in a fully functional web application capable of transforming raw supermarket data into actionable insights through dynamic visualizations. Successfully integrating various technologies, such as Django, Tailwind CSS, and Chart.js, enhanced my understanding of full-stack development and the importance of cohesive design and functionality

- **Museum slot booking website**
  The project culminated in a functional and aesthetically pleasing slot booking website for the college museum. I gained hands-on experience in real time project creating responsive and user-friendly designs, improving my skills in HTML, CSS, figma and JavaScript.
